ÖZET / SUMMARY

A skilled software engineer and graduate of the Software Engineering department at Haliç University, possessing a strong technical background in modern web technologies (Next.js, React, Node.js), mobile application development (Flutter, Dart), and data engineering/machine learning (Python, SQL, data analytics). Through internships and extensive independent projects, they have gained practical experience in full-stack architecture, e-commerce system integration, IoT solutions, and predictive modeling. They are well-suited for teamwork at a global standard, thanks to high adaptability and crisis management skills—honed through the international Work and Travel program—and B2-level English proficiency.

TEKNIK YETKINLIKLER / TECHNICAL SKILLS

Programming Languages	TypeScript, JavaScript, Python, Java, C#, SQL
Web Technologies	Next.js, React.js, Node.js, Express.js, RESTful APIs
Mobile Development	Flutter, Dart (Çapraz Platform iOS / Android)
DB & Tools	SQL Server, NoSQL, MongoDB, PostgreSQL, Git, GitHub, Docker, LaTeX

DENEYIM / EXPERIENCE

Piri Medya — Mobile App Developer (Intern)

July 2024 – Oct 2024

- Cross-platform mobile optimization for iOS and Android platforms using Flutter framework and Dart language. Participated in application development processes.
- User experience was enhanced through in-app performance optimizations and efficient RESTful API integrations.

Software Persona — Mobile and Web Development Interni

Apr 2026 – May 2026

- Architectural planning, interface prototyping, and backend service integration processes for modern web and mobile applications were executed using a full-stack approach.
- Database schemas and queries were optimized to ensure full data consistency across different clients.

Work and Travel Programı (New Jersey, ABD) — Seasonal Resort worken

June 2025 – Oct 2025

- Çok kültürlü, dinamik ve yoğun tempolu bir iş ortamında üst düzey profesyonel sorumluluk ve esnek çalışma disiplini ka zanıldı.
- **Sosyal Yetkinlikler:** Doğal İngilizce konuşma ortamında ileri düzey (B2) dil pratiği, beklenmedik operasyonel krizlerde anlık çözüm üretme, stres yönetimi ve yüksek adaptasyon yeteneği.

Haliç Üniversitesi — Corporate Communications Officer

Seasonal

- Planning promotional strategies for prospective university students; managing effective public speaking, corporate communication, and public relations processes.

PROJELER / PROJECTS

Urban Livability Index of Antalya

Veri Odaklı Analiz

TECHS: PYTHON, OPENSTREETMAP API, GOOGLE EARTH ENGINE, K-MEANS CLUSTERING,DATA ANALYTICS

• A dynamic urban livability index was designed for the neighborhoods of Antalya by processing open-source geospatial data.

• Scoring models based on neighborhood-level socio-economic and infrastructural data analytics were successfully implemented using K-Means clustering algorithms.

TCGiftShop — Full-Stack E-Commerce Platform

Web & Mobil

TECHS: NEXT.JS, REACT, NODE.JS, SQL SERVER, DART, FLUTTER

• An end-to-end e-commerce platform with cross-platform support and database integration that works seamlessly on both web and mobile devices.

• It leverages a modern headless architecture built with Next.js and Supabase to deliver lightning-fast page loads, real-time data synchronization, and a friction-free checkout experience

FinPulse — Mobil Finance App

Mobil Uygulama

TECHS: NoSQL, OpenAI, Python

• This is an autonomous data pipeline project that automatically collects real-time price data and global news feeds for financial and crypto assets, storing them on Supabase. After processing the collected data using technical indicators such as RSI and MACD, the system generates investment rationales and signals via Gemini AI integration and visualizes them on a dynamic charting dashboard.

AI & ML Data Analysis Trainingı

Makine Öğrenmesi

TECHS: PYTHON, SCIKIT-LEARN, PANDAS, IEEE DATASETS, LATEX

• Project performance predictions were generated by running five different advanced machine learning models on IEEE datasets, and model accuracy metrics (accuracy, precision, recall) were analyzed and reported.

Teknofest Project — Smart Agriculture & Soil Fertility Measurement

IoT / Donanım-Yazılım

TECHS: PYTHON, IOT SENSORS, EMBEEDED SYSTEMS, DATA FLOWI

• An end-to-end smart IoT system architecture was developed to support agricultural sustainability by measuring, analyzing, and reporting soil quality, moisture levels, and mineral levels in real time.

EDUCATION & CERTIFICATES

🎓 Haliç University

Software Engineering(Bachelor's degree) |
2021 – 2026

🗣️ Dil Yetkinliği

İngilizce: B2 (İleri Düzey Orta - Uluslararası Deneyimli)

• Machine Learning with Python Certificate

• Introduction to Programming with Java Certificate

• C# Programming: From Scratch to Advanced Certificate

• Vertex AI and Artificial Intelligence Workshop Certificate of Participation
